The GECS conference is the first conference on the basic of theoretical and practical aspects of conversion systems in renewable energies. GECS is a highly interactive conference that enables an effective interchange of results and ideas among researchers around world. The three-day event consists of a conference with plenary invited session, regular papers and posters exhibition.

Topics of interest include, but are not limited to:

TPSE: Thermal and Photovoltaic Solar Energies

HWGE: Hydro and Wind Green Energies

ESHT: Energy Storage and Hybrid Topologies

SGPP: Smart Grids and Power Plants

FCHEV: Fuel Cell and Hybrid Electrical Vehicle

HVDC: High Voltages DC Networks

GRA: Geothermal Resources and Applications

APEC: Advances in Power Electronic Converters

MSO: Modeling, Simulation & Optimization

EMMS: Energy Management in Multi source Systems

MS: Materials and Semiconductors

EHES: Energy Harvesting & Embedded Systems

BHB: Biofuel, Hydrogen and Biomass
